

# **ROBOT MAGICIANS MAKE CRANES DISAPPEAR!**

## **THE AI FUTURE OF CONSTRUCTION IS HERE.**

**Sitting at a street café in London, with my croissant and cappuccino, I am in awe at the scene across the street.**

**Construction was never like this before. There are NO sounds of drills or machines, only slight whooshing sounds as if closing an air tight door.**

**The building is obviously going to be some 150 metres tall, as the central core built from prefabricated sections is already completed.**

**2 floors of lightweight beams in a grid have already been silently pulled to the apex by a system of belts and trusses and secured into place.**

**As I watch the next floors being effortlessly hauled up, the hydraulic actuators from the perimeter of the top floors, glide effortlessly below placing outer columns, hand over hand, in and out in a ballet of perfect symmetry.**

**The construction site is still fenced off from the road as usual to keep the public safe, but I am amazed at the cleanliness and silence as the robots do their work.**

**Once the grid of steel for another 2 floors are in place, profiled sheets are delivered from the central core and laid, stabilising the completed storey.**

**At this rate construction of the high-rise tower block will take just 12 weeks and without a crane in sight!**

**The robotic hydraulic actuators are controlled from a console in an office at the entrance to the site. I can see them from across the way. There are no more than 3 people watching the blinking lights of the computer screens.**

**There are images on a billboard of the finished block, with apartments for sale and occupation in 6 months.**

**This robotic construction system developed by Crane-X is the Artificial Intelligence that the construction world has been anticipating.**

**Architects and Engineers are eagerly seeking to apply their imaginative designs to this rapid build system. The possibilities are endless.**

- **Developers worldwide can envisage the speed of return on the investments.**
- **Financiers are looking at the quick returns on those developments.**
- **Town and City planners are in awe of the solution to their housing and workspace scarcities.**
- **The public seeking new efficient living spaces with state-of-the-art modern equipment are eager to move in.**
- **Companies wanting efficient intelligent workspaces are keen to move in.**
- **Health & Safety experts can't wait to see an end to crane collapses and the further elimination of risk in an industry that is notorious for its bad records.**

**Crane-X have made all that possible now.**

**Crane-X are the AI future of Robotic Construction.**

**The Crane-X system has patents approved across the globe.**

- **European Patent office**
- **Germany**
- **Spain**
- **Switzerland**
- **France**
- **UK**
- **Australia**
- **UAE**
- **China**
- **USA**

- **India**

## **GET IN ON THE MOST EXCITING THING TO HAPPEN TO CONSTRUCTION NOW.**

**CRANE-X are actively seeking partners and investors.**

**Do not miss out on the future of construction worldwide.**

**No matter whether the country has high or low labour costs this system will eliminate those comparisons.**

**This will re-align where the skills and trades are required.**

**A cleaner safer future for all.**

**The ultimate WIN-WIN investment. The Crane-X system creates tangible assets from the ground up, the sky is the limit.**

**Crane-X are seeking partners in Engineering and Construction**

**to actively use, promote and build with us.**

**Crane-X are seeking funders to take this system to the next level.**

**The next generation of robots will fit the modules. Prefabricated offices, kitchens, bathrooms, lounges will slot into place on guides using the same hydraulic actuators.**

**The Crane-X system inventor will host presentations at the following venues: -**

**Come and see the video presentations of the system in operation and meet the guy behind this revolution in construction.**

**Are you interested in being at the forefront of technology in construction?**

**Are you interested as an investor?**

**Are you just interested in the exciting future of this industry?**

**Just register your interest and we'll keep you up to date with our progress.**

**Don't miss out on this opportunity to get in on the ground floor (no pun intended) of this totally new concept.**

**JOIN OUR ROBOT MAGICIANS NOW & HELP TO  
ELIMINATE CRANES FROM THE CONSTRUCTION  
PROCESS.**

**NAME:**

**EMAIL:**

**PHONE:**

**DON'T LOSE OUT, JOIN WITH US IN MAKING THE  
CONSTRUCTION PROCESS SAFER, CHEAPER, QUICKER**

**Just register your interest and we'll keep on bringing you updates  
on when we move to our next phase of development.**

**We'd hate you to miss out on the potential that this investment has  
to offer.**

**This is the innovation that governments have been looking for.**

**The future is here.**
