

Divi – Designs

Architectural & Planning Services.

Bespoke Visionary Designs

of the Highest Quality

Created for our Clients.

Divi-Designs are established Architectural and Design professionals based in London.

We have developed an outstanding reputation for giving our clients a personal service that delivers exclusive and innovative designs. We make a point of building a relationship with you, to bring alive your concept.

Your dream of transforming your property into that beautiful home in the glossy magazine of your mind will take shape with our bespoke professional service. Our partnership with you will increase the space and add value to enhance the whole living space. Value comes in both the monetary increase and the desired usage of the design concepts.

The range of architectural services are carried out in stages from start to finish from the initial visit through to the completion of your project.

We eliminate the stresses and strains

Building works on your property can be a stressful activity. We remove that anxiety and pressure by working closely with you. Our professional and friendly relationship makes you part of our team.

We guide you through the regulatory procedures obtaining planning permissions and interpreting the building regulations that affect the project.

This is a partnership that produces quality

We guarantee to assist you with the best planning advice. We partner with you to bring you the highest quality Planning, Building Control and Construction Drawings.

We'll assist you with the tendering process for builders and contractors.

We work side by side with you through all of the architectural procedures or you can decide if you only wish to use certain stages of the process.

Once through the regulatory process and drawings are agreed we stay with you. We give you quality and personal service.

Our Past Projects

We have a portfolio of high-end residential extensions and projects that have increased the value of the owner's properties that provided them with innovative solutions and contemporary designs. Examples of these and the case studies can be found on this website.

Free Initial Consultation

To help you with your original ideas we give you a free, hour-long, no obligation site visit and consultation where you will get the personal professional advice you need to make your choices.

A Bespoke Service tailored especially for you

At our initial meeting we will establish the client's key requirements, carry out a feasibility assessment, and clarify that brief into a proposal which will identify costs, planning requirements, and any other relevant regulations or issues.

We interpret your priorities and incorporate them into the whole design. We keep you informed and work closely to ensure your vision is applied.

Guaranteed Planning Approvals

If you decide to use the full architectural service we will produce the design drawings and submit for the necessary approvals. The planning approval process can be complicated. Divi-Design has considerable experience of negotiating these with the necessary local authority planning departments.

Technical Project Assistance

Once the technical design is approved we will assist with the actual works, any appointments where you may require other consultants, such as structural engineers, and with contractors suited to your project.

Specifications, quality and scope of works can be defined to issue to the appointed contractors.

Interior Designs

We can assist with the interior designs, bringing quality themes as required to bathrooms, kitchens and various electrical, lighting or other finishes and fittings.

Creative and stunning, innovative and contemporary, radical designs can produce that luxurious lifestyle living that you always imagined. Comfort and magnificence that will forever bring a quality of life to amaze you. Great home designs bring you that in abundance.

Project Management

We can arrange full project management and administration to completion.

All of these stages can be negotiated separately to suit the client's needs.

Great Designs can make a radical difference to life

Architects and their designs can change your life, we wish to improve your life, to increase the value of your property, to increase the quality of your life. Great designs make a difference, they make life interesting and the great thing about a great design is that it can be whatever you want it to be.

Let us work with you to bring your dreams to reality.
